Blue Girl Rose flowers Photo courtesy of NetPS Plant Finder upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Blue Girl Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

## COUNTRY GARDENS

## Planting \& Growing

Blue Girl Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH . It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
